REPORT NO. FT 120

UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

Country of Origin by Subgroup

JANUARY 1960

SPECIAL NOTICE

The revised commodity and subgroup codes in the January 1960 edition of Schedule A are being used to compile the import statistics beginning January 1960. See pages 6A and 6B of this report for further explanation and lists of commodity and subgroup codes affected by the revision of Schedule A.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, January, 1960. Washington 25, D. C. April, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)

2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I

3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"

4. Individual country codes as shown in Schedule C

5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,080	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

COMMODITY AND SUBGROUP CODES IN THE JANUARY 1, 1960 EDITION OF SCHEDULE A USED FOR COMPILING IMPORT STATISTICS BEGINNING JANUARY 1960 - CERTAIN 1954 CODES ARE REVISED OR OBSOLETE

Effective January 1960, the United States import statistics reflect codes and classifications in the January 1, 1960 edition of Schedule A. Plans for the new Schedule A were announced in the April 1959 issue of Foreign Trade Statistics Notes. The Schedule is being sold on a subscription basis only at a cost of $4.00 plus $1.00 additional for foreign mailing. Orders for a subscription to the Schedule should be addressed to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Some of the reasons for changing commodity numbers or for revising the coverage of "basket" classifications are as follows:

1. The classification was combined with another classification.
2. The classification was subdivided, with each of its components forming a new classification.
3. The classification was combined with one or more other classifications and the combination subdivided to form two or more separate and entirely new classifications.
4. One or more items in a "basket" classification were taken from the "basket" and set up as separate classifications or merged with other classifications.
5. One or more separate classifications, or parts of classifications were merged with a "basket" classification.
6. The classification was renumbered to improve the statistical outline of the Schedule.

Following is a list of the 1954 Schedule A commodity numbers (in effect in December 1959) which have been affected by the revision of Schedule A.

In addition to the foregoing, the Schedule A commodity classifications in effect for reporting cotton manufactures during the first half of 1959 have been discontinued and the more detailed classifications used in compiling the data for the months of July-December 1959 are incorporated in the 1960 edition of Schedule A. (See the August 1959 issue of the Notes.)

Also beginning with January 1960, subgroup data for United States imports are presented in terms of the new 3-digit subgroup code classifications presented on page XXIX of the January 1, 1960 edition of Schedule A, and in subsequent issues of this report. The 3-digit subgroup code numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. For 2-digit subgroup designations merely renumbered without a change in commodity coverage, a zero has been added as the third digit of the code number. For those 2-digit subgroups undergoing any change in commodity coverage, a digit other than zero has been added as the third digit. Such changes in subgroup coverage results from (1) "combination," "breakout," "renumbering," or other changes in coverage of Schedule A commodity classifications effective January 1960, (2) the subdivision of a 2-digit subgroup, with each of its components forming a more detailed 3-digit subgroup, or (3) the combination of some of the Schedule A commodity numbers in one 2-digit subgroup with all or some of the commodity numbers in other subgroups to form new 3-digit subgroups. Following is a list of the 2-digit subgroups (in effect during 1959 and earlier periods) which have been affected by the revisions:

12	28	61	80
16	45	62	85
19	47	73	87
20	48	75	88
24	60	77	90
			93

USERS OF THE IMPORT STATISTICS FOR THE COMMODITIES OR COMMODITY SUBGROUPS COVERED BY THE CODE NUMBERS LISTED ABOVE AND IN THE AUGUST 1959 ISSUE OF THE FOREIGN TRADE STATISTICS NOTES ARE URGED TO CONSULT THE 1960 EDITION OF SCHEDULE A FOR THE REVISED COMMODITY AND SUBGROUP CODES AND CLASSIFICATIONS SHOWN IN THE STATISTICS FOR JANUARY 1960 AND SUBSEQUENT PERIODS.

Beginning January 1, 1960, the commodity numbers and descriptions in Schedule A should not be used by importers and others in preparing import entry and withdrawal forms. The January 1 edition of Schedule A has been issued as a reference manual only to aid the users of the statistics in interpreting the codes and classifications to be shown in various tabulations and published reports of United States imports issued by the Bureau of the Census for January 1960 and subsequent periods. For purposes of reporting imports on import entry and withdrawal forms, reference should be made to the 8-digit reporting numbers and other requirements in the January 1, 1960 edition of United States Import Duties Annotated for Statistical Reporting.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

NOTICE

A service exists whereby users of this report may receive selected information from it about two weeks prior to the release of the printed report. This service is available on payment of the cost of making and transmitting a special copy of the selected information. The cost for this service generally runs a few dollars a month for one or two commodity classifications, the cost being higher if a large number of figures are requested. These "advance" reports are described in the April 1958 *Foreign Trade Statistics Notes* and new "advance" reports are listed (together with their cost) in monthly issues of the *Notes* when they are first started. These "advance" reports are also listed in the *Catalog of U. S. Census Publications*.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, February, 1960. Washington 25, D. C. May, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

USCOMM--DC

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,288,589,488
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		53,792,879
010	Animals, edible (except for breeding)	0010600-0015500	6,404,577
020	Meat products	0018300-0035500	24,078,808
030	Animal oils and fats, edible	0036000-0036900	266
040	Dairy products	0037000-0046990	2,164,620
050	Fish and fish products, except shellfish	0047000-0079590	11,800,950
060	Shellfish and products	0080100-0087900	8,691,240
070	Other edible animal products	0088100-0097900	652,418

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, March, 1960. Washington 25, D. C. June, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, April, 1960. Washington 25, D. C. June, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, May, 1960. Washington 25, D. C. July, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,253,133,853
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		59,869,705
010	Animals, edible (except for breeding)	0010600-0015500	6,942,039
020	Meat products	0018300-0035500	24,252,957

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, June, 1960. Washington 25, D. C. August, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

SPECIAL NOTICE

The "Grand total" value of imports for consumption on page 52 of Calendar Year 1959 issue of Report No. FT 120 should read 14,987,074,926 (instead of the 4,987,074,926 shown). This was a printing error and does not affect the detail figures in the report.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR-EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, July, 1960. Washington 25, D. C. September, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

SPECIAL NOTICE

The country designations in this report have been changed for a few countries in Western Africa reflecting changes in Schedule C designations resulting from recent political changes in Africa. The combination of Italian Somaliland and British Somaliland is reflected in the compilation of the data as well as in the country name. The affected countries and areas have been appropriately footnoted in this publication. See Circular Letter No. FT-276 available at Collectors of Customs and Department of Commerce Field Offices for further information.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,144,836,093
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		61,942,314
010	Animals, edible (except for breeding)	0010600-0015500	1,687,780
020	Meat products	0018300-0035500	32,481,670
030	Animal oils and fats, edible	0036000-0036900	2,762
040	Dairy products	0037000-0046990	1,794,580
050	Fish and fish products, except shellfish	0047000-0079590	16,318,744
060	Shellfish and products	0080100-0087900	8,969,513
070	Other edible animal products	0088100-0097900	687,265
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		30,250,884
080	Hides and skins, raw (except furs)	0201000-0299900	5,947,108
090	Leather	0301400-0345900	2,733,281
100	Leather, rawhide, and parchment manufactures	0350300-0699990	8,183,365
110	Furs and manufactures	0701000-0759900	5,783,160
121	Animal and fish oils, fats, and greases, inedible	0803000-0821600	675,190
130	Other inedible animals and animal products	0840000-0990290	6,928,780
	GROUP 1—VEGETABLE FOOD PRODUCTS AND BEVERAGES		200,754,140

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, August, 1960. Washington 25, D. C. October, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DO AR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, September, 1960. Washington 25, D. C. December, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

USCOMM--DC

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, October, 1960. Washington 25, D. C. December, 1960.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

USCOMM--DC

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,156,945,610
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		61,302,906
010	Animals, edible (except for breeding)	0010600-0015500	2,722,090
020	Meat products	0018300-0035500	24,852,458
030	Animal oils and fats, edible	0036000-0036900	...
040	Dairy products	0037000-0046990	3,825,768
050	Fish and fish products, except shellfish	0047000-0079590	17,530,442
060	Shellfish and products	0080100-0087900	11,900,986
070	Other edible animal products	0088100-0097900	471,162
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		31,238,450
080	Hides and skins, raw (except furs)	0201000-0299900	4,955,010
090	Leather	0301400-0345900	3,744,657
100	Leather, rawhide, and parchment manufactures	0350300-0699990	10,963,166
110	Furs and manufactures	0701000-0759900	5,183,204
121	Animal and fish oils, fats, and greases, inedible	0803000-0821600	242,652
130	Other inedible animals and animal products	0840000-0990290	6,149,761
	GROUP 1—VEGETABLE FOOD PRODUCTS AND BEVERAGES		207,179,451
140	Grains and preparations	1020000-1090260	5,234,175
150	Fodders and feeds, n.e.s	1101000-1190800	1,067,753
161	Vegetables and preparations	1191100-1250900	5,045,485
170	Fruits and preparations	1290000-1330990	11,042,142
180	Nuts and preparations	1350000-1380140	7,202,251
191	Vegetable oils and fats, edible	1420000-1428200	2,647,646
201	Cocoa, coffee (including essences, substitutes and adulterants), and tea	1501300-1521000	109,465,159
210	Spices	1523100-1550590	3,643,741
220	Sugar and related products	1570000-1654800	29,952,019
230	Beverages	1711300-1900000	31,879,080
	GROUP 2—VEGETABLE PRODUCTS, INEDIBLE, EXCEPT FIBERS AND WOOD		63,805,286
241	Rubber and allied gums and manufactures	2011000-2098950	33,272,236
250	Gums, resins, and balsams, n.e.s	2102000-2189400	2,283,981
260	Drugs, herbs, leaves, roots, etc	2201000-2220490	1,178,965
270	Oil seeds	2231000-2240740	5,964,741
281	Expressed or extracted oils and fats	2241000-2260280	4,630,232
285	Essential or distilled oils	2270100-2290490	1,514,212
290	Dyeing and tanning materials	2302000-2345955	948,142
300	Seeds, except oil seeds	2401000-2460990	985,125
310	Nursery and greenhouse stock	2501000-2599100	1,897,668
320	Tobacco and manufactures	2601000-2629900	10,289,206
330	Miscellaneous vegetable products	2800000-2990190	840,778
	GROUP 3—TEXTILE FIBERS AND MANUFACTURES		92,438,896
340	Cotton, unmanufactured	3001010-3005000	407,681
350	Cotton, semimanufactures	3006150-3021400	1,256,223
360	Cotton manufactures	3030000-3230800	17,255,167
370	Jute and manufactures	3241500-3250900	9,507,862
380	Flax, hemp, and ramie and manufactures	3261000-3390590	3,525,648
390	Other vegetable fibers and manufactures	3401000-3421990	4,722,987
400	Wool, unmanufactured	3501050-3541000	13,857,199
410	Wool semimanufactures	3550000-3574600	3,425,094
420	Wool manufactures	3607000-3680800	17,124,297
430	Hair and manufactures, n.e.s	3690000-3698900	710,876
440	Silk and manufactures	3702000-3799900	8,167,860
451	Man-made fiber semimanufactures	3800000-3815500	1,562,611
455	Man-made fiber manufactures	3830000-3880490	4,904,589
460	Miscellaneous textile products	3900300-3981100	6,010,802
	GROUP 4—WOOD AND PAPER		138,395,427
471	Wood, unmanufactured	4007520-4080500	1,626,372
481	Sawmill products (lumber)	4103100-4207555	25,039,557
490	Wood manufactures	4208000-4280990	15,900,466
500	Cork and manufactures	4300000-4321900	821,041
510	Paper base stocks	4590000-4692900	29,070,472
520	Paper and manufactures	4711000-4799990	65,937,519
	IMPORTS FOR CONSUMPTION—Continued		
	GROUP 5—NONMETALLIC MINERALS		174,542,805
530	Coal and related fuels	5001000-5014300	249,456
540	Petroleum and products	5052100-5079100	119,012,304
550	Stone, lime, cement, gypsum, and gypsum products	5080250-5193900	2,966,385
560	Glass and glass products	5200400-5290900	7,752,918
570	Clay and clay products	5300000-5390700	9,269,585
580	Other nonmetallic minerals and manufactures (except precious stones and imitations)	5391000-5930980	15,500,943
590	Precious and semiprecious stones, imitations, and industrial diamonds	5950000-5958200	19,791,214
	GROUP 6—METALS AND MANUFACTURES, EXCEPT MACHINERY AND VEHICLES		173,971,832
601	Iron and steel making raw material	6001000-6004300	27,863,410
611	Steel mill products	6005000-6116200	28,168,873
621	Iron and steel manufactures	6117000-6200994	8,809,678
630	Ferro-alloys, ores and metals, n.e.s	6211000-6270900	13,001,858
640	Aluminum and manufactures	6301000-6305900	19,514,971
650	Copper and manufactures	6400400-6430300	23,412,288
660	Brass and bronze manufactures	6453000-6459900	4,959,817
670	Lead and manufactures	6502300-6509900	10,782,346
680	Nickel and manufactures	6540000-6544900	9,480,459
690	Tin	6550000-6551900	9,996,072
700	Zinc and manufactures	6557000-6559900	8,140,326
710	Miscellaneous metal manufactures, nonferrous ores, metals and alloys, n.e.s. (except precious)	6650000-6790990	3,753,700
720	Precious metals, jewelry, and plated ware	6819000-6900550	6,088,034
	GROUP 7—MACHINERY AND VEHICLES		105,412,207
731	Electrical machinery and apparatus	7063200-7100980	27,673,132
740	Power generating machinery, n.e.s	7110000-7110700	1,010,173
751	Metalworking machinery	7400510-7410000	2,143,754
753	Textile and sewing machinery	7495000-7550900	4,951,869
759	Other machinery, except agricultural	7690000-7840980	17,181,302
760	Agricultural machinery and implements	7850000-7890400	4,370,422

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, November, 1960. Washington 25, D. C. January, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample. The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499 sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, December, 1960. Washington 25, D. C. March, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown on the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, ususual shipments, problems of valuation, classification, etc.) A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

SPECIAL NOTICE

DISCONTINUANCE OF FOREIGN TRADE STATISTICS NOTES

The separate publication Foreign Trade Statistics Notes, which has carried supplementary information and explanations of interest to users of foreign trade statistics, has been discontinued. Instead, any special notes prepared for the information or guidance of users will be carried in a current issue of the statistical publications themselves, or in special announcements mailed with the regular publications. Copies will be attached to reference copies of tabulations, where appropriate.

Announcements of new or renewed special foreign trade reports contracted for on a cost basis by users will be shown in the first available issues of Reports No. FT-110 and FT-410. Lists of such special reports will also continue to appear quarterly in the Catalog of Census Publications. Subscriptions to the Catalog may be made, at a cost of $1.25 for 4 consecutive issues including 12 issues of the monthly Supplement (75 cents additional for foreign mailing), through the Government Printing Office. The policy with respect to the furnishing of cost reports, and with respect to cost-sharing arrangements for reports desired by more than one user, was outlined in the April 1958 issue of Foreign Trade Statistics Notes, and is still in effect. Reprints will be furnished upon request. Announcements of any changes in the policy will be made in a current issue of the statistical reports.

Collectors Bulletins listing additional items to be included in the Schedule B commodity classifications, formerly carried in the Foreign Trade Statistics Notes, will also be included in Report No. FT-410.

Users who do not keep permanent files of foreign trade statistical reports should, before disposing of individual issues, clip and retain for future reference any notes which are of lasting interest or which will be needed for future reference.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99, (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Formal entry $1 to $99, and informal entry $1 to $250 shipments" (not shown in this report but published in FT 970-I
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

The statistics in this volume were prepared, under the direction of the Foreign Trade Division, Economic Operations, Machine Tabulation, Electronic Systems and Administrative Service Divisions. The persons contributing most to this publication are listed below:

Foreign Trade Division: Import Branch, Victor O. McNabb, Chief; Shirley Dungee, Assistant Chief; Classification and Codes, John R. Anglin; Special Investigations, Publications and Coverage, Sadie Bayne. Regulations and Program Coordination Branch, Emerson Jones, Publications Coordination. Economic Operations Division: Clerical Processing Branch, Wesley R. Grier, Chief; Procedures Branch, Nathan Lesowitz, Chief; Methods Evaluation and Determination Branch, Samuel Schweid, Chief; Electronic Programming Branch, Jack A. Scharff, Chief; Nathaniel Swersky, Assistant Chief; Electronic Processing Branch, Margaret R. Rommel, Chief; Directory Branch, Manila C. Ramier, Chief; Foreign Trade Section, Lucille P. Morgan, Chief; New York Office, Emily H. Laut, Chief. Machine Tabulation Division: Foreign Trade Section, Vincent Greer, Chief. Electronic Systems Division: Programming Branch, Dorothy P. Armstrong, Chief. Administrative Service Division: Graphics Branch, Robert H. Brooks, Chief; John F. Lanham, Assistant Chief.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for in-transit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly and Annual Coverage

In general, the compiling procedures provide for the inclusion of shipments in the statistics for the month of import. However, because of processing problems, there has always been a carry-over of a few percent of shipments from their proper month to a subsequent month, usually the following month. Normally, the amount of carry-over from month to month (and from year to year) remains substantially constant. In March 1958, the amount of carry-over was increased in order to take full advantage of early release dates made possible with the use of electronic equipment for processing import data.

For individual countries and commodity subgroups, the carry-over procedure as a whole may result in the inclusion in the 1960 statistics of some shipments made in 1959 and/or the exclusion from the 1960 statistics of some 1960 shipments which will appear in the 1961 statistics.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance

with their arrangement in Schedule C. The Table of Contents on page 9, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country valued at more than $100 reported on formal entries.

The country designations in this report have been changed for a few countries in Africa reflecting changes in Schedule C designations resulting from certain political changes in Africa during 1960. The affected countries and areas have been appropriately footnoted in this publication. Data in this report reflect the combination of Italian Somaliland and British Somaliland as the Somali Republic effective July 1960. Therefore data reported for Somaliland and for British Somaliland reflect data for the period January-June 1960, while data reported for Somali Republic reflect data for the period July-December. For other African countries where changes in political status took place during the year without change in geographic area, data for the full year are reflected in this report under the new Schedule C country name as it appeared in monthly foreign trade publications at the end of the year.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 10 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, special announcements of interest to users of Report FT 120 will be included in the monthly issues of this report; other announcements on imports will be included in the monthly issues of Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 10.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.c.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States).

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to

which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using figures for 1958 and later periods for purposes of comparison with figures for periods prior to 1958, account must be taken of the coverage which was in effect for earlier periods, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior periods. The country by subgroup and country by group figures, except group 9, for January 1954 - December 1957 are comparable to periods prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54 120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

COMMODITY AND SUBGROUP CODES IN THE JANUARY 1, 1960 EDITION OF SCHEDULE A USED FOR COMPILING IMPORT STATISTICS BEGINNING JANUARY 1960 - CERTAIN 1954 CODES ARE REVISED OR OBSOLETE

Effective January 1960, the United States import statistics reflect codes and classifications in the January 1, 1960 edition of Schedule A. Plans for the new Schedule A were announced in the April 1959 issue of Foreign Trade Statistics Notes. The Schedule is being sold on a subscription basis only at a cost of $4.00 plus $1.00 additional for foreign mailing. Orders for a subscription to the Schedule should be addressed to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Some of the reasons for changing commodity numbers or for revising the coverage of "basket" classifications are as follows:

1. The classification was combined with another classification.
2. The classification was subdivided, with each of its components forming a new classification.
3. The classification was combined with one or more other classifications and the combination subdivided to form two or more separate and entirely new classifications.
4. One or more items in a "basket" classification were taken from the "basket" and set up as separate classifications or merged with other classifications.
5. One or more separate classifications, or parts of classifications were merged with a "basket" classification.
6. The classification was renumbered to improve the statistical outline of the Schedule.

Following is a list of the 1954 Schedule A commodity numbers (in effect in December 1959) which have been affected by the revision of Schedule A.

SCHEDULE A NUMBERS WHICH WERE MODIFIED OR BECAME OBSOLETE EFFECTIVE JANUARY 1, 1960

In addition to the foregoing, the Schedule A commodity classifications in effect for reporting cotton manufactures during the first half of 1959 have been discontinued and the more detailed classifications used in compiling the data for the months of July-December 1959 are incorporated in the 1960 edition of Schedule A. (See the August 1959 issue of the Notes.)

Also beginning with January 1960, subgroup data for United States imports are presented in terms of the new 3-digit subgroup code classifications presented on page XXIX of the January 1, 1960 edition of Schedule A, and in subsequent issues of this report. The 3-digit subgroup code numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. For 2-digit subgroup designations merely renumbered without a change in commodity coverage, a zero has been added as the third digit of the code number. For those 2-digit subgroups undergoing any change in commodity coverage, a digit other than zero has been added as the third digit. Such changes in subgroup coverage results from (1) "combination," "breakout," "renumbering," or other changes in coverage of Schedule A commodity classifications effective January 1960, (2) the subdivision of a 2-digit subgroup, with each of its components forming a more detailed 3-digit subgroup, or (3) the combination of some of the Schedule A commodity numbers in one 2-digit subgroup with all or some of the commodity numbers in other subgroups to form new 3-digit subgroups. Following is a list of the 2-digit subgroups (in effect during 1959 and earlier periods) which have been affected by the revisions:

12	28	61	80
16	45	62	85
19	47	73	87
20	48	75	88
24	60	77	90
			93

USERS OF THE IMPORT STATISTICS FOR THE COMMODITIES OR COMMODITY SUBGROUPS COVERED BY THE CODE NUMBERS LISTED ABOVE AND IN THE AUGUST 1959 ISSUE OF THE FOREIGN TRADE STATISTICS NOTES ARE URGED TO CONSULT THE 1960 EDITION OF SCHEDULE A FOR THE REVISED COMMODITY AND SUBGROUP CODES AND CLASSIFICATIONS SHOWN IN THE STATISTICS FOR JANUARY 1960 AND SUBSEQUENT PERIODS.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. For an explanation of the sampling procedure and revised coverage see pages 5 and 7, respectively, of this report.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

[4]Effective July 1960; combines former Somaliland and former British Somaliland. (See page 3 of this report for further information.)

[5]Totals cover the months of January-June 1960 only; included in Somali Republic effective July 1960. (See page 3 of this report for further information.)
